

The figure is a line plot with the x-axis ranging from 0 to 100 and the y-axis ranging from 0.0 to 1.0. There are nine data series, all labeled 'local_f1_acc' in the legend, each represented by a different colored dashed line. All series show a rapid increase in the y-value as the x-value increases from 0 to approximately 10, after which they plateau. The plateau values are very similar, ranging from approximately 0.84 to 0.86. The lines are closely clustered together, indicating high consistency across the different runs.
